

8) This will make it possible to develop better projects and to meet the specific needs of the children and teachers in question, with positive impacts for educational outcomes. It will increase the efficiency of the resources invested in school infrastructure projects and will lead to more effective cooperation between the different specialists involved in the development of school infrastructure

We have

SCHOOL LIBRARY

we own a **FYULE lab** This is an educational platform designed to help students learn through video creation. The platform offers lessons and tutorials on video creation techniques, helping students become confident communicators Students can practice new video-creation techniques and share their projects with a community of young creators

We have **E BOT** allowing students to learn about electronics and programming through hands-on projects.
