

NATURE CONSERVATION DAY AT BV

"Conservation is not a burden; it is our responsibility towards Earth and its inhabitants. Let's unite our efforts on this world Nature Conservation Day for a sustainable tomorrow".

Globally, the most debated topic is about climatic changes, and it is time for us to stop the talk and begin to act. Focused on nature conservation BVites of Class VI to VIII engaged themselves enthusiastically with activities to create

awareness on nature conservation through Talk Show, demonstrations, slogans and brilliant exhibits of handmade planters, bird feeders and wealth out of waste.

The little initiative taken could awaken the mind of the youngster to make their contributions towards conserving electricity, water, food resources and so on. There was a lot to take back from the session and to give back to nature. Take care of the small things and the big thing will fall in place.
