First of all I would like to congratulate entire Ryan group including management ,teachers and students on completing this year successfully in spite of this critical pandemic situation .I really appreciate ryan International School for understanding not only student as well as parents problems . As initially I was little worried that the this academic year will not be as effective but Ryan Institute and their hard working faculty proved me wrong and very first time I am happy to be proven wrong .I really want to appreciate ryan International School for understanding not only students but as well as their parents problem and for dealing with this critical situation so smoothly.As the school started it's classes with the zoom app but very soon they launched their own app Ryan OS because of which student were enjoying doing their classes and assignments as they did not seems to need any help to complete it due to effectively and organizing all things so systematically which tends to show the hard work and efforts team have put into this. The school faculties keep updated all the essential information to the parents so they keep track of their child's day to day progress .

I would like to express my heartfelt gratitude to the teachers they played the role of main pillars throughout this academic year for which I would like to give a huge thanks to all of you for making our kids so comfortable with your strong dedication and commitment. all the teacher had done a great job the way teacher have conducted the classes were amazing I could see not only my son but all the students responding so well and taking interest in each and every class. The syllabus, assignment activities and school level competition as well as interschool zonal level are done in well planned and conducted in a organised manner .the classroom has been helpfull in successfully implemented that kids become familiar to attending classes with Disciplinary way and submission of assignment and projects fun based learning quizzes game made this more interesting for the kids. Beside academic kids also were enjoying all activities like a dance mono acting physical training this all proves that the teacher's have put in their Heart and Soul into it .I never felt much difference between the regular classes and online classes in spite of that I felt my son had learned some new skills like how to adjust in new situation, computer skill and some soft skill all thanks to the teacher and their efforts.

At the end I would Like to thanks teachers like Ansari ma'am ,Simmi ma'am,Tabasum ma'am for listening each and every kids attentively and making class so interesting and always motivating them to speak up their answer and doubts during the class by providing friendly environment and fun method of teaching and tried to explain each and everything to each and every kids till they understood and a very special person I would like to mention for this year Alpa ma'am as she's not only a fantastic teacher who played role not just as Guardian but also sometime motherly as she was always ready to motivate and support also was a mentor to my son.

I just want to say that as a parents I am very happy and satisfied with the support and efforts teachers are taking for our children. I appreciate it and thanks all the teachers and Ryan groups.
