Yes, at Disha Delphi Public School, we take great pride in providing an organized and transparent school system that enhances the day-to-day experience for both students and parents.

Communication Channels: We maintain open lines of communication through various channels such as regular newsletters, parent-teacher meetings, and a dedicated online WEBSITE where parents can access updates on their child's progress, events, and important school announcements. Regular meetings and discussions are held to share progress updates, discuss areas of improvement, and set goals for the students.

To facilitate strong parent-teacher communication, our school holds open days every 2nd and 4th Saturday for face-to-face interactions. Moreover, a dedicated hour in the evening is set aside for telephonic conversations with parents, ensuring regular and meaningful engagement in their child's education.

Clear Policies and Procedures: Our school has well-defined policies and procedures in place, covering areas like attendance, assessment, and discipline. These are readily available to both parents and students, ensuring everyone is aware of the expectations and guidelines. Attendance of students is through RFID Cards and in case student is absent SMS is sent to parents.

Parent Involvement: We actively encourage parents to engage in the educational journey of their children. This includes participating in school activities, attending parent-teacher meetings, and volunteering for events and committees. Parents are a part of **SMC committee** so that parents are a part of decision making at school.

Accessible Staff: Our teachers and administrative staff are approachable and readily available to address any concerns or queries from parents. We believe that this accessibility fosters a sense of trust and collaboration between the school and parents.

COMMUNITY INVOLVEMENT THROUGH RALLIES

Parent-Teacher Collaboration: We highly value the partnership between parents and teachers in ensuring the academic success and overall development of our students.

Feedback Mechanism: We actively seek feedback from parents regarding their experience with the school and any suggestions they may have for improvement. This feedback loop helps us continuously refine our educational processes.
